

## FUHSI HOLDS MAIDEN MATRICULATION CEREMONY

The Federal University of Health Sciences, Ila-Orangun, (FUHSI), has matriculated 526 pioneer students in its maiden matriculation ceremony held on the 11<sup>th</sup> of July 2023 at the University's Event Centre in Ogbagbara, Ajaba, Ila-Orangun, Osun State.

The students were the lucky ones among the 7,421 admission seekers who applied to study in the University. While delivering his matriculation speech, the Vice Chancellor, Prof. Akeem Olawale Lasisi highlighted the nine programmes currently ran in the University.

According to him, "the 526 founding students were admitted into the nine programs the University currently runs. These include Audiology, Medical Laboratory Science, Biochemistry, Medicine and Surgery, Information Technology and Health Informatics, Microbiology, Nutrition and Dietetics, Pharmacology and Nursing". The Vice-Chancellor further expressed the hope that the students "training will not only make them outstanding scholars and professionals but will also instill in them the character that aligns with their intended professional calling." He emphasized that the University would continuously challenge the students to ensure they can compete with their peers globally in the fields of research and healthcare delivery.

According to Prof. Lasisi, "the institution aims to become a world-class University of Health, Nutrition, and Medical Sciences, that contributes to national preparedness and resilience in the anticipation of future challenges in the health sector, while also reducing medical tourism abroad". He stated that this vision would be achieved through the University's commitment to excellent teaching, active innovative learning, and maintenance of a high standard of professional responsibilities.

The guest lecturer, Prof. Oluwale Atoyebi, during his lecture, urged the matriculating students to take their studies seriously and focus on their academics. He reminded them that they were admitted to the University as science students with a strong background in mathematics, physics, chemistry, and biology. He admonished that "these skills need to be further developed because, in secondary schools, you complete the majority of your study and assignments in class but, now, you must complete all your reading, studying, and assignments outside classrooms. Therefore, time management and planning are critical to your success as you are expected to study for about 20 hours a week on your own." Prof. Atoyebi concluded by emphasizing the importance of cultivating a good academic culture in the University.

Present at the event were the University's Principal Officers led by the Vice Chancellor, Prof. Akeem Olawale Lasisi, followed by the Registrar, Mr Kassim Kayode Babamale, Bursar, Mr Adelani Adedayo Oyewale, University Librarian, Mrs Bukky Olufemi Asubiojo, the Provost, College of Medicine, Prof. Aishatu Ahmed Gobir, Dean, Student Affairs, Prof. Taofeeq Oduola, Dean, Faculty of Science, Prof. Mutalib Adeniran Aderogba, Dean, Faculty of Basic Medical Sciences, Prof. Ahmad Adekilekun Tijani, Director, Academic Planning, Heads of Departments and Administrative Officers. Also present were Royal Fathers, former Deputy Governor, Osun State, Mr Benedict Olugboye Alabi who represented Chief Bisi Akande, other members of staff, invited guests and parents/guardians of matriculating students.

### *The Vice Chancellor's Speech: Higher Education in Nigeria: History is made in Ila-Orangun today.*

Protocol:

The Principal Officers, invited guests, representative of the National University Commission (NUC) and Joint Admission and

Matriculation Board (JAMB), our distinguished Guest Lecturer, Prof. Wole Atoyebi, Royal Highnesses, the Pioneer Matriculating Students of the FEDERAL UNIVERSITY OF HEALTH SCIENCES, ILA-ORANGUN our Happy Parents, Members of the Fourth Estate, distinguished ladies and gentlemen.

It is with profound gratitude to Almighty Allah and my pleasure to welcome you all most excitedly to this maiden matriculation ceremony of the FEDERAL UNIVERSITY OF HEALTH SCIENCES, ILA-ORANGUN which marks the official enrolment of every matriculating student into the academic programmes of the University in line with the approval of National University Commission.

Matriculation is the formal process of entering a university as a candidate for a degree, or of becoming eligible to enter by fulfilling certain academic requirements, such as a formal examination. As your Vice-Chancellor, I can confirm that all of you gathered here today for this University' maiden matriculation have shown convincing evidence of a broad educational background and good standards of literacy and numeracy and a high standard of performance in Joint Admission Matriculation Board (JAMB) and the School Certificate Examinations in addition to your success in the University Post-UTME. You have all passed through a rigorous academic crucible of tests and have come out as worthy of further training in your individual studies. You are among the 526 candidates out of the 7,421 that applied to our University. I, therefore, congratulate you and your parents for this remarkable success. In addition to your matriculation, I am glad that you are also making history as the pioneer students in our University. As this University established by Government of 2021 and the site take-off of activities in I, therefore, you again, you those who assiduously, in University to reality.

For Principal University, the with my

me and the Officers of the journey started appointment as your Vice-Chancellor on February 18, 2022. Today marks a culmination of our untiring efforts on the preparation of the permanent and temporary sites, resource verification for and accreditation of our nine programmes by the National University Commission, head hunting of highly resourceful personnel, academic and non-academic and creative innovation in fund drive among many other activities preparatory to opening the University to students. The signing into law by President Muhammadu Buhari on the 22<sup>nd</sup> May, 2023 finally birthed the new Federal University of Health Sciences, Ila-Orangun. The objectives of the Federal Government of Nigeria in establishing the University resonates in our mission and vision. We envision to be a world class University of Health, Nutrition and Medical Sciences in building national preparedness and resilience in anticipation of future challenges in the health sector while also reducing medical tourism abroad. We will achieve this through our philosophy of commitment to excellent teaching, active and innovative learning and palpable excellence in the discharge of all of our professional responsibilities. Hence, we are making history together in Ila-Orangun today as we are contributing to the richness of the higher education space in Nigeria.

I urge you to be impactful in your sojourn through this citadel of academia, as this administration will always challenge you to ensure that you are comparable with your peers in the global space in the world of research and health care delivery. At Federal University of Health Sciences, Ila-Orangun it is our hope that your training will not only make you outstanding scholars and professionals, but will also imbibe in you the

character that goes with your intended professional calling. You are therefore encouraged to be diligent in your studies and maintain good character at all times.

As part of our efforts to ensure that you are fully equipped for the learning journey you are

embarking on, we invited one of the leading lights in University administration in Nigeria in the person of Chief Moji Ladipo, a former Registrar of the University of Ibadan to share her experience with you as part of your orientation programme. Today, we have invited an eminent medical scholar, a successful surgeon and an exemplary medical education administrator again in the person of Prof. Oluwale Atoyebi to give our pioneer matriculation lecture. Prof. Atoyebi is one of the most qualified persons to deliver this history making lecture haven been a university teacher of many decades, Provost of one of the oldest Colleges of Medicine in Nigeria, President of the Nigerian Medical Association and Registrar of the National Postgraduate Medical College. I am glad that he found time to honour us with his presence today.

Let me end this speech by giving special recognition to the followings:

- Osun State Government for the donation of the temporary and permanent site
- Senior Special Assistant on Sustainable Development Goals on the building of the University Health Center
- Federal Ministry of Works for the construction of the ceremonial road
- Hon. Femi Fakeye for the donation of the 1000seater capacity Multipurpose Hall, the venue of the matriculation.
- Ila Community for donation of the Accommodation for the Principal Officers

I congratulate you all as you matriculate and wishing you the best success in your study at the Federal University of Health Sciences, Ila-Orangun. I welcome your parents, guardians, friends and well-wishers. I hereby declare the Matriculation ceremony open.

Cross section of matriculants of the Department of Microbiology

#### *The Guest Lecturer's Speech:*

**UNLOCKING POTENTIAL IN YOU TOWARD BECOMING THE BEST HEALTH CARE PROVIDER: A SPEECH DELIVERED BY THE GUEST LECTURER, PROFESSOR OLUWOLE ATOYEBI**

#### *PROTOCOL*

It gives me great pleasure to address this gathering that has been organized for the matriculation of the pioneer students of the Federal

University of Health Sciences, Ila-Orangun. Having been very close to the University system since 1971 when I was admitted like you to the University of Lagos, I do know that this occasion is an important landmark in the life of all students here present. This is a statutory gathering to formally admit deserving and qualified candidates who are fortunate to be offered admission into this specialized University with focus on Health, Nutrition and Medical Sciences. It has been stated that the University “is expected to lay a foundation for building National preparedness and resilience in anticipation of future challenges in the health sector while also reducing medical tourism abroad”. I congratulate the Government for this initiative and the pioneer students and staff for this epoch making event. *(We must give Kudos to His Excellency, Chief Bisi Akande, CFR, who single handedly made this University a reality. Let us all give him a resounding applause in appreciation).*

**PROFESSOR OLUWOLE ATOYEBI, MB, BS (Honours), MD, FMCS, FWACS, FICS, FACS, FNIM, FNMA, DFMC, FNAMed.**

I have been asked to speak on the topic: “UNLOCKING

POTENTIAL IN YOU TOWARD BECOMING THE BEST HEALTH CARE PROVIDER”. It is appropriate to start with some definitions before going on. Firstly, what is meant by “UNLOCKING HUMAN POTENTIAL”? It has been stated that “Human potential is the innate ability of every person to live and perform in alignment with their highest self”. The American psychologist, Abraham Maslow in his 1943 paper “A Theory of Human Motivation”

pointed out the “hierarchy of needs”. This started the human potential movement in the 1960s which emphasized the importance of self-actualization, exploring what it meant and how to achieve it. Maslow indicated that certain behaviours and mindsets were critical to human development. Unlocking your human potential requires a whole person approach in which you have to work on your physical well-being as well as your inner self; which helps you to become more focused and productive. You will be able to bring your best self to work when you develop self awareness, empathy and psychological flexibility.

Dear pioneer students, your admission to the University opens a new phase in your life. Universities are complex social organizations with distinctive cultures. On the one hand, academic freedom and autonomy are inviolable values and, on the other hand, changing environmental conditions exert strong influence on the primary functions of universities. To unlock your potentials, you must appreciate the huge difference between the Secondary Schools where you are coming from and the University where you are now. Universities differ from Secondary schools in a number of significant ways. University students have more freedom

but also more responsibility. You must adapt quickly to a campus environment that includes new ways to learn, new rules and responsibilities, and new relationships. You have been admitted because you are science students with appreciable background in Mathematics, Physics, Chemistry and Biology. One can confidently assume that you possess the necessary potentials. These need to be unlocked because while in the Secondary school, you complete the majority of your studying and assignment work in class; now, you must complete all your reading, studying, and assignments outside of class. With this scenario, time management and planning are critical to your success as you are expected to study for about 20 hours a week on your own. Academic culture of universities mainly consists of academic outlooks, academic spirits, academic ethics and academic environments. Campus culture in a university is characterized by individuality, academic feature, variety and creativity.

There is no doubt that all of you aspire to graduate as a group of “BEST HEALTHCARE PROVIDERS”. However, you must remember that the distance between today’s ceremony and convocation ceremony is huge and it is hoped that the journey ends successfully. For this to happen, you need to be regular in attendance at lectures and practicals, carrying out all your assignments, shunning deviant behaviours and other vices that can expose you and others to danger. The training for all cadres of health care providers is arduous. There are so many subjects to study and so many skills to master. These involve long hours of study and the need to get exposed to practical/clinical skills best available at night and odd hours in the Teaching Hospital setting. A good Clinical student has little time for frivolities.

At the Secondary School level, like most students, you probably crammed the night before an examination, and you probably did well. Unfortunately, cramming is not going to help you much in a medical university. First, the volume of information that you need to take in and memorize is much greater than in most other courses. The flow of information coming to you is like drinking water out of a fire hose. To succeed, you will need not only more time but also better time management as mentioned earlier. Secondly, unlike in your former school, where you often do not need to remember anything after an examination, the content in medical education is cumulative, that is, the information you learned in your first year remains relevant months and even years later. Thirdly, not only do you need to remember the information, but you also need to constantly update it as new research makes some of the things you learned more relevant and makes others out of date. Finally, the stakes in the health professions are so much higher. Forgetting a critical piece of information is not just going to give you a poor score, it can seriously harm your patients in future.

There are three key techniques of learning that you should know to fulfill your goal of becoming a great health care provider. The first is Multimedia Learning. Multimedia learning is a perfect combination of pictures, animations, text, and videos. It is a far better and effective study technique than traditional learning methods.

**L-R: Prof. Ahmad A. Tijani, Dean Faculty of Basic Medical Sciences, Mrs. Bukky O. Asubiojo, University Librarian, Mr. Adeleni A. Oyewale, Bursar, Prof. Oluwole A. Atoyebi, Guest Lecturer, Prof. Akeem O. Lasisi, Vice-Chancellor, Mr. Kassim K. Babamale, Registrar, Prof. Aishatu A. Gobir, Provost College of Medicine, Prof. Mutalib A. Aderogba, Dean Faculty of Sciences.**

According to research, multimedia learning can enhance the brain's ability to deeply understand the concept by making a strong connection between verbal and visual representation of content. The second technique is Self-Assessment. If you want to memorize complex medical terminologies or pharmacological concepts, the best thing you can do is practice. Taking practice tests is undoubtedly an effective study technique to absorb information. Self-assessment helps you figure out your weak points early on in the study process.

This allows you to focus your time and energy on absorbing those topics that you need to review to perform better during examinations. Adding question banks to your study schedule is undoubtedly a sensible approach. The third technique is Spaced Repetition. Spaced repetition study technique involves dividing the course material into

small, manageable chunks and reviewing it repeatedly for a long period of time. The goal of this study technique is to embed information into long term memory. It is only by so doing that any of you can be one of the "BEST HEALTHCARE PROVIDERS", that is a "FIVE-STAR HEALTH PROFESSIONAL".

L-R: Prof. Oluwole A. Atoyebi, Guest Lecturer, Prof. Akeem O. Lasisi, Vice-Chancellor, Mr Benedict O. Alabi, Former Deputy Governor, Osun State, Representing Chief Bisi Akande, Mr. Kassim K. Babamale, Registrar.

I hope you know that Hotel star ratings are an internationally-accepted indicator of a hotel's quality, cleanliness and standards. The higher the star rating the more you can expect from the hotel, with one star hotels offering minimal convenience and a five star hotel providing a high-end luxury experience. The BEST HEALTHCARE PROVIDER might thus be described as "the FIVE-STAR HEALTH CARE PROVIDER," someone who is equal in excellence to a five-star hotel, but is accessible to everyone from the richest to the poorest.

Herein under is the Profile of a "FIVE-STAR Doctor" (Adapted from Dr Charles Boelen, Chief of Educational Development of Human Resources for Health, World Health Organization, 1994):

□ **Care provider**-Who considers the patient holistically as an individual and as an integral part of family and the community, and provides high quality, comprehensive, continuous and personalised care within a long term relationship based on trust.

□ **Decision maker**-Who chooses which technologies to apply ethically and cost-effectively while enhancing the care he or she provides.

□ **Communicator**-Who is able to promote healthy lifestyle by effective explanation and advocacy, thereby empowering individuals and groups to enhance and protect their health.

□ **Community leader**- Who having won the trust of the people among whom he or she works, can reconcile individual and

community health requirements and initiate action on behalf of the community.

□ **Manager**-Who can work harmoniously with individuals and organisations inside and outside the health system to meet the needs of patients and communities, making appropriate use of available health data. (cont'd).

I do not entertain any doubt whatsoever that each of you is fully equipped to be a FIVE-STAR HEALTHCARE PROVIDER. What is now needed is for you to position yourselves appropriately so that those potentials in you can be unlocked to make you shine. You must develop sensitivity and understanding and a desire to help people. You must develop the ability to work well with others and have patience and the ability to remain calm in stressful situations. You must develop the ability to accept criticism and work well under pressure and to be thorough and pay attention to details. You must also develop excellent verbal communication skills. With all these potentials in you unlocked, you can definitely become the BEST HEALTHCARE PROVIDER.

In conclusion, I wish to enjoin you to take the appropriate techniques to unlock your potentials through effective learning strategies throughout your journey, developing the best study habits, using great study tools and using study techniques that I described in the right way that will help you to fulfil your goal of becoming the BEST HEALTHCARE PROVIDER. Make sure that you are physically fit at all times by observing healthy eating habits, adequate exercises and having adequate sleep. As Pioneer students, the responsibility of creating a reputable culture for the University rests on you. Culture is the system of shared beliefs, values, practices, and symbols that group members use to understand, cope with, and interact with one another and their environment, and is transmitted from generation to generation through participation and learning. This is a Federal University which is located in Ila Orangun but does not belong to Ila Orangun alone.

There will therefore be many people, Staff and Students, from various parts of Nigeria and indeed the whole world. By their very nature, universities bring people together with the common goal of learning – both in academics and our greater environments. Universities provide a unique opportunity for different people to spend time together and gain an understanding of each other's backgrounds, traditions, and lives. Exposure and interaction with cultures different from ours can immeasurably expand our world. Learning about others' experiences allows us to better understand the broader world around us. Ila Orangun itself will benefit immeasurably and the economy will expand in leaps and bounds through what you all bring to the township.

Once again I congratulate all the matriculating students and wish you an industrious and fruitful stay in the serene environment of Ila Orangun. I pray that the Almighty God will protect all of you and make you all a source of pride to your families so that today's joy may be permanent.
